

AN INVITATION TO THE ONES WHO START THINGS

START YOUR BUILDING'S OWN MARKET.

THE FOUNDER
MANAGER · PIONEER
ONE MARKET PER BUILDING

*You already keep your neighbors connected.
Suki turns that same group into a real market
you run. For condo admins, village officers,
and anyone who holds a community together.*

FOR CONDO & VILLAGE GROUP ADMINS
COST FREE TO START

ROLE COMMUNITY MANAGER
SETUP ABOUT 2 MINUTES
ORIGIN METRO MANILA, PH

YOUR GROUP CHAT WAS NEVER A MARKET.

You keep three Viber threads alive. You pin the rules nobody reads. You watch a good order get buried under stickers by lunch. You already built the hard part, the community. What it never had was a market: a cart that holds the order, stock that says sold out, and pay that goes straight to the cook.

WHAT YOU ALREADY HAVE

The neighbors

People who check the group every day

The trust

They know each other by name and unit

Cooks who already sell

Home kitchens posting in your chat now

WHAT YOU ARE STILL MISSING

A cart that holds the order

Nothing scrolls away by lunch

Stock that says sold out

The app answers "meron pa po ba?"

Pay that goes to the cook

Direct, with zero commission taken

Same neighbors. Same trust. A market that finally works.

THE MISSION

When a neighbor cooks and a neighbor buys, *the money stays on your floor.*

Every building has cooks who could earn and neighbors who would rather buy from someone they know. The only thing missing is a market. When you start one, you are not running a group chat anymore. You are building the small, honest economy of your own building. Bawat building, sariling palengke.

STAYS LOCAL

Money spent moves floor to floor, not out to an app.

WALANG COMMISSION

Cooks keep every peso they earn. The platform never takes a cut.

MAS MALAPIT

Handed over by a neighbor, not a rider stuck at the gate.

TOTOONG SUKI

Regulars who come back, not one-time strangers.

THE POWERS OF A COMMUNITY MANAGER

01

**FOUND THE MARKET***one community*

Create your building's market in two minutes. Make it public, unlisted, or private behind a join code only your neighbors get.

02

**SET THE RULES***your house*

Write the house rules everyone agrees to before they join. Respect, honesty, no spam. Your building, your standard.

03

**KEEP IT SAFE***moderation*

Warn, suspend, or take a listing down. Bogus sellers and junk posts do not last in a market you moderate.

04

**FEATURE A STORE***the gold spot*

Put one store in the spotlight at the top of the feed. A gift you can give a favorite cook, or a spot you can offer.

05

**VERIFY OFFICIAL***trust badges*

Approve a real store's Official badge against proof, so buyers know exactly who they can trust.

06

**GRANT BOOSTS***fifty a month*

Hand out visibility from a monthly pool of fifty boosts to the cooks who have earned a lift.

07

**GROW BY QR***one scan to join*

Print a join QR for the lobby or drop it in the group. One scan, one tap, and a neighbor is in.

08

**EARN THE SEAL***official market*

Unlock a printable certificate that marks your community as a verified, official Suki market.

FOUR MOVES, ONE AFTERNOON.

Starting a market is not hard. A market only needs sellers before buyers, and you already know who the cooks are.

1

Create the community 2 MINUTES

Make it at sukineighbors.com. Name it after your building. Keep it private with a join code so only your neighbors get in.

2

Share the join link ONE MESSAGE

Drop it in your group chat. We hand you the message to paste. Neighbors tap once and they are in, no sign-up wall.

3

Invite the cooks THREE TO FIVE TO START

Message the neighbors who already sell food in your chat. Ask them to post one benta. Sellers first, and the buyers follow.

4

Let it run IT GROWS ITSELF

Neighbors order, cooks earn, word spreads floor to floor. You moderate, feature, and keep it honest. That is the whole job.

THE FIRST-MOVER

Every building will have a market. The only question is who starts it. The first one is the market neighbors remember, the one cooks join first, and the one *you* run.
